

## Welcome to the Rocket Software Quarterly Newsletter

We'd like to use this update to give you a snapshot of the latest Rocket Software news and product updates relevant to our valued clients in Singapore. For this edition we'll be concentrating on effective Application Lifecycle Management (ALM) which is key to streamlining a team's ability to produce and release software.

### **29 March Announcement: Singapore DevOps teams benefit from Rocket and Kantion partnership**

In response to an increase in installations in Asia of Rocket's Aldon Application Lifecycle Management product, Rocket Software and their Premier Partner Kantion are bringing additional Aldon skills and resource to Singapore.

This expansion is in line with Rocket Software's already-impressive growth that has seen it establish a solid track record across industries as diverse as banking, finance, insurance, government, pharmaceuticals, CPG, IT and electronics in Singapore.

"Singapore's IBM i community supports a vibrant business culture, so enabling efficient, reliable application changes across IBM i and other platforms is key for IT teams." explains Richard Bryett, Kantion's Managing Director. "As a result, we have further invested in our Aldon implementation and training resources and are working closely with Rocket to deliver the expertise needed in Singapore."

Kantion is a Rocket Premier Partner with over a decade of experience in implementing and supporting Aldon, and recent investment in additional staff and skills has been key to supporting a growing customer base of over 30 Aldon customers. For more detail on Kantion, visit - <http://www2.rocketsoftware.com/Bc00zB2IC000006S00wI00e>
